

# TEACHER INDUCTION PROGRAM

The Center for Teacher Innovation offers a meaningful and manageable Teacher Induction Program. We provide an induction experience that develops instructional expertise through research-based learning opportunities and high-quality mentoring to accelerate teacher effectiveness and student success. The program is designed for anyone with a California preliminary teaching credential teaching in any setting around the world.

CTI offers a traditional two-year induction experience and a one-year Early Completion Option (ECO) for those who meet eligibility criteria. Upon securing a teaching position, candidates may begin their induction journey during our fall or winter enrollment periods.

## PROGRAM BENEFITS

- Individual weekly meetings with a trained reflective coach.
- Curated resources that support engaging in focused cycles of inquiry to develop effective teaching practice.
- Comprehensive credentialing services.

CTI partners with districts, charter schools, and private schools. Additionally, we provide a fully online, private pay induction option for individual teachers who may not have access to induction through their employers.
